Plastic cards in credit card quality

We use plastic cards virtually every day – as a credit card, customer card, voucher card, info card, season ticket or membership card...

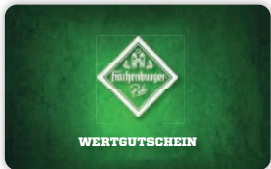

Customer cards

Small but mighty: plastic cards can do a lot

Plastic cards are not only handy and practical – they **can also do a lot**. With personalization, barcode, QR code, writing field, scratch field or magnetic strip, they fulfill many purposes and are partly digital data storage devices.

Plastic cards can do a lot

Gift cards

Note: In contrast to often offered cheap cards with UV varnishing our cards are several layers with overlay films pressed under heat and then punched out precisely. As a result, they meet the high quality requirements of DIN ISO/IEC 7810.

Benefit from plastic cards

Plastic cards have established themselves with great success as bonus and **customer cards**. Plastic cards are also being used more and more frequently as club cards, season tickets, voucher cards or membership cards. This increases customer numbers, membership and sales – in a practical and reliable way.

Benefit from plastic cards

Season tickets

Season or permanent tickets for clubs

Many clubs are thrilled: plastic cards as season or **permanent tickets** are all the rage. Printed on one or both sides, with a glossy or matte surface. Use our samples as a basis for your text and your club crest.

Season tickets for clubs

Info cards

Small quantities – individual and inexpensive

Plastic cards in check card quality: inexpensive **from 100 pieces**, individual design according to supplied print data, with glossy or matte surface and any desired additional option. In terms of quality, shape and dimensions, these cards also comply with the ISO 7810 standard.

Business cards in credit card quality – an excellent alternative

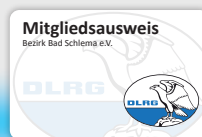

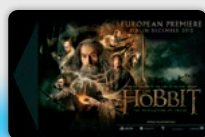

With our high-quality **plastic business cards** you are sure to attract special attention – because the cards not only look top, but are also practical, robust and hard-wearing – especially ideal when wet or dirty.

Another benefit:

Plastic cards are more likely to be kept and kept longer than cardboard business cards, which are often unceremoniously discarded. This is how you remain permanently in memory...
