Foil stickers

Foil stickers for inside and outside

*We encounter stickers everywhere – on cars, appliances, packaging, containers, windows...
High-quality stickers survive for many years.
That's lasting advertising!*

Specialist for stickers

Sticker specialist

We have been producing foil stickers in various forms for a very long time.
We started with the printing of tokens.

In the meantime, it is a colourful variety:

- Product advertising, promotions, events
- Logo and sticker sheets, collection forms
- Token systems (with security punching)
- Information and type plates

TOP quality

Stickers in TOP quality

Our stickers have very special quality features:

- High detail sharpness – through professional UV offset printing
- Durability for several years outdoors – due to colours with highest light fastness
- Additional UV varnish as protection against weathering and solvents
- Use of high-quality branded foils
- Any special format up to max. 35x50 cm
- Individual cutting dies possible for each motif

NOT FOR EVERYBODY

UV offset

UV offset printing with all possibilities

For foil printing we have Heidelberg UV offset printing presses with 5 UV printing units, UV coating unit and INLINE punching unit. This allows us to combine high quality and a wide range of variations with effective production in the shortest possible time.

Inline die-cutting

Our speciality: inline die-cutting

Printing and die-cutting are often two separate operations. With our inline die-cutting unit, these are perfectly combined. This not only saves time and costs, but also brings clear quality advantages:

- 100% exact fitting accuracy of print and die-cut image
- Punch through, punch on and perforation possible at the same time
- Time/cost savings due to elimination of the punching pass
- Quality control during the entire production process and not only after the last work step

Branded foils

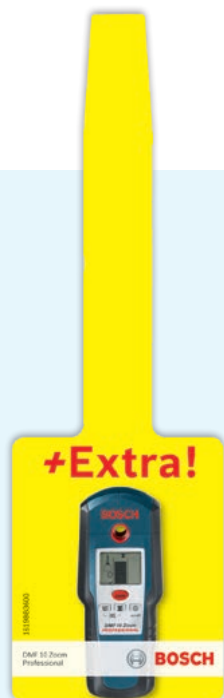

Use of high-quality materials

For stickers we use self-adhesive branded foils with a matching foil/adhesive combination.

- High-quality self-adhesive foils, white, matt or transparent
- Different adhesives: permanent, removable, extra-permanent
- Special foils (PP, PE, etc.) on request

Applications

- Address stickers
- Advertising stickers
- Backglass stickers
- Bin stickers
- Car stickers
- Closure labels
- Container stickers
- Fee stickers
- Hazard stickers
- Identification stickers
- Industrial stickers
- Information stickers
- Labels
- Logo sheets

Sticker sheets

Foil stickers for inside and outside

The inline die-cutting plate is fitted on the magnetic cylinder of the UV offset press.

What you should know...

Sticker formats

50 x 20 mm = smallest format

480 x 320 mm = largest format

Free format:

Any intermediate size possible in 1 mm steps

UV offset printing technology

Maximum print sheet format: 520 x 370 mm

Minimum print sheet format: 145 x 105 mm

Printing units and special units: 5 UV units + 1x coating unit (inline) + 1x die-cutting unit (inline), UV offset printing in waterless technology (for higher colour density)

UV inks + varnishes

Print colours:

All UV print colours (HKS + Pantone) with highest light fastness, e.g. also magenta and yellow with light fastness "7" according to DIN
As partial underprint for transparent foils, release liner or overprint for window stickers (for inside, side-inverted)

Opaque white:

Special UV varnish, non-shrinking, high weather resistance

UV varnish:

Inline die-cutting

Cutting dies:

Different line heights possible (punching in and through in 1 pass)
Punching tools as steel sheets (0,5 – 1,0 mm)
Punching absolutely accurate, high uniformity over all lines, no broken edges on the die-cutting contour (die-cutting in wet UV coating)

Standard foil

Branded foil, several years of durability even outdoors
Foil 80 my, PVC white matt, adhesive permanent or removable, Slotted backing paper, matt surface for better ink adhesion

Common foils

Branded foils, several years of durability even outdoors
Foil 200 my, white matt / transparent, adhesive permanent or removable, backing paper not slotted
Foil 100 my, white matt / transparent, **adhesive EXTRA-permanent**, Special adhesive for particularly firm hold on difficult substrates, Backing paper not slit
